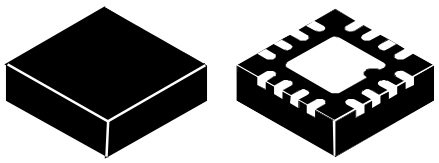
STOD32A

300 mA triple DC-DC converter for powering AMOLED displays

Data brief



QFN16(3.0x3.0 mm)

Features

- Operating input voltage range from 2.5 V to 4.5 V
- 300 mA output current for step-up and inverting converters (V_{IN}> 2.9 V)
- 55 mA output current for an auxiliary step-up converter (V_{IN}> 2.9 V)
- 4.6 V positive step-up converter
- Programmable negative voltage from - 0.8 V to - 4.8 V default -4.0 V
- Auxiliary step-up converter positive voltage programmable step from 5.8 V to 7.9 V default 7.6 V
- Soft-start with inrush current protection
- Overtemperature protection
- True-shutdown mode
- Short-circuit protection
- Package QFN16 (3.0x3.0 mm), 0.5 mm pitch

Applications

- Active matrix OLED power supply in portable devices
- Cellular phones, multimedia players, camcorders and digital still cameras

Description

The STOD32A is a triple DC-DC converter for AMOLED display panels. It integrates 300 mA step-up and inverting DC-DC converters plus auxiliary step-up converter. This device is particularly suitable for battery operated products, in which the major concern is overall system efficiency. Output voltages can be programmed by a dedicated pin, which implements SWIRE protocol. Soft-start with controlled inrush current limit, thermal shutdown and short-circuit protection are integrated functions of the device.

Table 1: Device summary

Order code	Positive voltage	Negative voltage	Auxiliary positive voltage	Package	Packing
STOD32ATPQR	4.6 V	-0.8 to 4.8 V	5.8 to 7.9 V	QFN16 (3x3 mm)	3000 samples per reel
