## Operational Amplifiers

For Commercial, Industrial, and Military Applications

**Features:**

- Short-circuit protection and latch-free operation
- Unity-gain phase compensation with a single 30-pF capacitor
- Replacement for industry types 101, 201, 301A
- CA301A Slew Rate (Summing ampl.) 10 V/us

**Applications:**

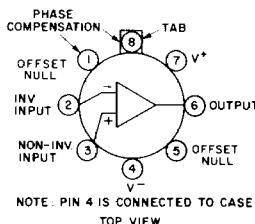

- Long-interval integrator
- Timers
- Sample-and-hold circuits
- Summing amplifiers
- Multivibrators
- Comparators
- Instrumentation
- AC/DC converters
- Inverting amplifiers
- Sine- & square-wave generators
- Capacitance multipliers & simulated inductors

The CA101, CA201, and CA301A are general-purpose, high-gain operational amplifiers for use in military, industrial, and commercial applications.

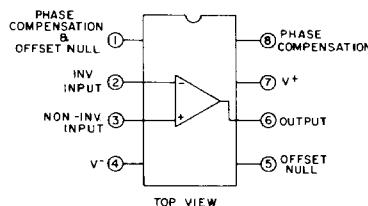

These types, which are externally phase compensated, permit a choice of operation for optimum high-frequency performance at a selected gain; unity-gain compensation can be obtained with a single 30-pF capacitor.

All types are available in 8-lead TO-5 style packages with standard leads (T suffix), and with dual-in-line formed leads ("DIL-CAN", S suffix). The CA301A is also available in the 8-lead dual-in-line plastic package ("MINI-DIP", E suffix), and in chip form (H suffix).

## Maximum Ratings, Absolute Maximum Values at $T_A = 25^\circ C$ :

### DC SUPPLY VOLTAGE (Between $V_+$ and $V_-$ Terminals):

CA101, CA201 .....	..... 44 V
CA301A .....	..... 36 V

### DC INPUT VOLTAGE .....

(For supply voltages less than  $\pm 15$  V, the Input Voltage rating is equal to the DC Supply Voltage)

DIFFERENTIAL INPUT VOLTAGE .....	..... $\pm 30$ V
----------------------------------	------------------

### OUTPUT SHORT-CIRCUIT DURATION .....

DEVICE DISSIPATION:	..... Indefinite*
---------------------	-------------------

UP TO  $T_A = 75^\circ C$  .....

Above $T_A = 75^\circ C$ Derate linearly at .....	..... 500 mW
---------------------------------------------------	--------------

6.67 mW/ $^\circ C$

### AMBIENT TEMPERATURE RANGE:

Operating —

CA101 .....	..... -55 to $+125^\circ C$
-------------	-----------------------------

CA201, CA301A .....	..... 0 to $+70^\circ C$
---------------------	--------------------------

Storage (All types) .....

-65 to $+150^\circ C$
-----------------------

### LEAD TEMPERATURE (During Soldering):

At a distance  $1/16"$   $\pm 1/32"$  (1.59  $\pm 0.79$  mm) from case for 10 seconds max. .....

\* At  $T_A \leq 70^\circ C$  and  $T_C \leq 125^\circ C$  (CA101);  $T_A \leq 55^\circ C$  and  $T_C \leq 70^\circ C$  (CA201, CA301A).
