

- Single-Chip Interface Solution for the 9-terminal GeoPort™ Host (DTE)
- Designed to Operate up to 4 Mbit/s Full Duplex
- Single 5-V Supply Operation
- 6-kV ESD Protection on All Terminals
- Backward compatible With AppleTalk™ and LocalTalk™
- Combines Multiple Components into a Single-chip Solution
- Complements the SN75LBC777 9-Terminal GeoPort Peripheral (DCE) Interface Device
- LinBiCMOS™ Process Technology

description

The SN75LBC776 is a low-power LinBiCMOS device that incorporates the drivers and receivers for a 9-pin GeoPort host interface. GeoPort combines hybrid EIA/TIA-422-B and EIA/TIA-423-B drivers and receivers to transmit data up to four megabits per second (Mbit/s) full duplex. GeoPort is a serial communications standard that is intended to replace the RS-232, Appletalk, and LocalTalk printer ports all in one connector in addition to providing real-time data transfer capability. It provides point-to-point connections between GeoPort-compatible devices with data transmission rates up to 4 Mbit/s full duplex and a hot-plug feature. Applications include connection to telephony, integrated services digital network (ISDN), digital sound and imaging, fax-data modems, and other serial and parallel connections. The GeoPort is backwardly compatible to both LocalTalk and AppleTalk.

While the SN75LBC776 is powered-off ($V_{CC} = 0$) the outputs are in a high-impedance state. When the shutdown (SHDN) terminal is high, the charge pump is powered down and the outputs are in a high-impedance state. The driver enable ($\overline{DEN}$) terminal sends the outputs of the differential driver into a high-impedance state with a high input signal. All drivers and receivers have fail-safe mechanisms to ensure a high output state when the inputs are left open.

A switched-capacitor voltage converter generates the negative voltage required from a single 5-V supply using four 0.1- μ F capacitors, two capacitors between the C+ and C- terminals and two capacitors between V_{EE} and ground.

The SN75LBC776 is characterized for operation over the 0°C to 70°C temperature range.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

GeoPort, LocalTalk, and AppleTalk are trademarks of Apple Computer, Incorporated.
LinBiCMOS is a trademark of Texas Instruments Incorporated.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)[†]

Positive supply voltage range, V_{CC} (see Note 1)	–0.5 to 7 V
Negative supply voltage range, V_{EE} (see Note 1)	–7 to 0.5 V
Receiver input voltage range (RA, RB)	–15 V to 15 V
Receiver differential input voltage range, V_{ID}	–12 to 12 V
Receiver output voltage range (RY)	–0.5 V to 5.5 V
Driver output voltage range (Power Off) ($\overline{DY1}$, DY2, DZ2)	–15 V to 15 V
Driver output voltage range (Power On) ($\overline{DY1}$, DY2, DZ2)	–11 V to 11 V
Driver input voltage range (DA, SHND, $\overline{DEN}$)	–0.5 V to $V_{CC} + 0.4$ V
Continuous total power dissipation	See Dissipation Rating Table
Electrostatic discharge (see Note 2): (Bus terminals), Class 3, A	6 kV
(Bus terminals), Class 3, B	500 V
(All terminals), Class 3, A	6 kV
(All terminals), Class 3, B	500 V
Operating free-air temperature range, T_A	0°C to 70°C
Storage temperature range, T_{stg}	–65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	260°C

[†] Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES: 1. All voltage values are with respect to network ground terminal unless otherwise noted.
2. This parameter is measured in accordance with MIL-STD-883C, Method 3015.7.

SLLS221B – NOVEMBER 1995 – REVISED MARCH 2002

recommended operating conditions

		MIN	NOM	MAX	UNIT
Supply voltage, V_{CC}		4.75	5	5.25	V
High-level input voltage, V_{IH}	DA, SHDN, $\overline{DEN}$	2		5.25	V
Low-level input voltage, V_{IL}	DA, SHDN, $\overline{DEN}$			0.8	V
Receiver common-mode input voltage, V_{IC}		-7		7	V
Receiver differential input voltage, V_{ID}		-12		12	V
Voltage-converter filter capacitance		0.2			μ F
Voltage-converter filter-capacitor equivalent series resistance (ESR)				0.2	Ω
Operating free-air temperature, T_A		0		70	$^{\circ}$ C

driver electrical characteristics over operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
V _{OH}	High-level output voltage	Single ended, See Figure 1	R _L = 12 kΩ	3.6	4.53		V
			R _L = 120 Ω	2	3.63		V
V _{OL}	Low-level output voltage		R _L = 12 kΩ	−4.53	−3.6		V
			R _L = 120 Ω	−2.7	−1.8		V
V _{OD}	Magnitude of differential output voltage (V _{DY}) − V _{DZ}	R _L = 120 Ω, See Figure 2		4			V
Δ V _{OD}	Change in differential voltage magnitude					250	mV
V _{OC}	Common-mode output voltage	See Figure 3		−1		3	V
ΔV _{OC(SS)}	Magnitude of change, common-mode steady state output voltage					200	mV
ΔV _{OC(PP)}	Magnitude of change, common-mode peak-to-peak output voltage			700			mV
I _{CC}	Supply current	SHDN = $\overline{\text{DEN}}$ = 0 V, No load	7		15		mA
		SHDN = $\overline{\text{DEN}}$ = 5 V, No load			100		μA
I _{OZ}	High-impedance output current	V _O = −10 V to 10 V, V _{CC} = 0 or 5 V				±100	μA
I _{OS}	Short-circuit output current (see Note 3)	V _O = −5 V to 5 V		±170		±450	mA

NOTE 3: Not more than one output should be shorted at one time.

driver switching characteristics over operating free-air temperature range (unless otherwise noted)

PARAMETER			TEST CONDITIONS	MIN	TYP	MAX	UNIT
t _{PHL}	Propagation delay time, high-to-low level output		Single ended, See Figure 4		42	75	ns
t _{PLH}	Propagation delay time, low-to-high level output				41	75	ns
t _{PZL}	Driver output enable time to low-level output	SHDN			25	100	μs
t _{PZH}	Driver output enable time to high-level output				25	100	μs
t _{PLZ}	Driver output disable time from low-level output				28	100	ns
t _{PHZ}	Driver output disable time from high-level output				37	100	ns
t _r	Rise time			10	25	75	ns
t _f	Fall time			10	23	75	ns
t _{PHL}	Propagation delay time, high-to-low level output		Differential, See Figure 5		40	75	ns
t _{PLH}	Propagation delay time, low-to-high level output				42	75	ns
t _{PZL}	Driver output enable time to low-level output	SHDN			25	100	μs
		$\overline{\text{DEN}}$			29	150	ns
t _{PZH}	Driver output enable time to high-level output	SHDN			25	100	μs
		$\overline{\text{DEN}}$			35	150	ns
t _{PLZ}	Driver output disable time from low-level output	SHDN			28	100	ns
		$\overline{\text{DEN}}$			34	100	ns
t _{PHZ}	Driver output disable time from high-level output	SHDN			37	100	ns
		$\overline{\text{DEN}}$			34	100	ns
t _r	Rise time			10	27	75	ns
t _f	Fall time			10	26	75	ns
t _{SK(p)}	Pulse skew, t _{PLH} – t _{PHL}					22	ns

receiver electrical characteristics over operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
V _{IT+}	Positive-going input threshold voltage	See Figure 6			200	mV
V _{IT–}	Negative-going input threshold voltage		–200			
V _{hys}	Differential input voltage hysteresis (V _{IT+} – V _{IT–})			50		mV
V _{OH}	High-level output voltage (see Note 4)	V _{IC} = 0, I _{OH} = –2 mA, See Figure 6	2	4.9		V
V _{OL}	Low-level output voltage	V _{IC} = 0, I _{OL} = 2 mA, See Figure 6		0.2	0.8	V
I _{OS}	Short-circuit output current	V _O = 0	–85	–45		mA
		V _O = V _{CC}		47	+85	
R _I	Input resistance	V _{CC} = 0 or 5.25 V, V _I = –12 V to 12 V	6	30		kΩ

NOTE 4: When the inputs are left unconnected, receivers one and two interpret these as high-level inputs and receiver three interprets these as low-level inputs so that all outputs are at a high level.

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
