

AB-EZPC-96

High Power Current Regulator with Bias Voltage Rectification

Features

- DFN3030 package (MSOP available)
- Built-in rectification circuit
- Accurate constant current
- Over Current Protection (OCP)
- Over temperature protection (OTP)

Description

AB-EZPC series is a constant current regulator with built-in bias voltage rectification circuit. It is designed to maintain constant current and hence constant luminance for DC powered LED lighting applications. AB-EZPC series rectifies power input for the LED string to operate regardless of the polarity of the bias voltage. Additionally, to ensure system reliability, AB-EZPC series is built with thermal protection function (OTP). The AB-EZPC series is available in 3030 DFN & MSOP 8 PIN packages.

Pin Description_3030 DFN

Pin No.	Name	Function
5	VA	Power input pin A
4	VB	Power input pin B
8	P+	Output pin to connect external LED positive.
1	N-	Output pin to connect external LED negative

Absolute Maximum Ratings

Parameter	Value
Supply Voltage VA-VB	38V
Output current	400mA
Junction Temperature	150°C
Operating Ambient Temperature TA	-20°C~85°C
Storage Temperature Range	-40°C~150 °C
Package Thermal Resistance (junction to ambient)	50°C/W
Lead Temperature (All Pb free packages, soldering, 10 sec)	260°C
ESD voltage protection, human body model	4KV

Recommended Operating Conditions

Symbol	Parameter	Min/Max	Unit
VA-VB	Supply Voltage	1.8 to 38	V
TA	Operating Ambient Temperature	-20 to 85	°C

Electrical Characteristics (TA = +25°C, unless otherwise specified.)

Characteristic	Symbol	Condition	Min.	Typ.	Max.	Unit
Output Current	Is	VA-VB >1.8		400		mA
Output Ramp Down Temperature	T1	Start point (100% current)		120		°C
Shutdown Temperature	T2	IP=0mA (0% current)		160		°C
