

SLES062A - MARCH 2003 - REVISED JUNE 2012

# CCD VERTICAL DRIVER FOR DIGITAL CAMERAS

Check for Samples: VSP1900

## FEATURES

- CCD Vertical Driver:
  - Three Field CCD Support
  - Two Field CCD Support
- Output Drivers:
  - 3 Levels Driver (V-Transfer) x 5
  - 2 Levels Driver (V-Transfer) x 3
  - 2 Levels Driver (E-Shutter) x 1
- Driver Capability:
  - 450 pF to 1890 pF With 60  $\Omega$  to 240  $\Omega$
- Input Phase:
  - 3 State (V-Transfer) x 5
  - 2 State (V-Transfer) x 3
  - 2 State (E-Shutter) x 1
- Portable Operation
  - Input Interface: 2.7 V to 5.5 V

- Power Supply:
  - VDD 2.7 V to 5.5 V
  - VL -5 V to -9 V
  - VM GND
  - VH 11.5V to 15.5 V

## **APPLICATIONS**

- Digital Camera
- Video Camera

## DESCRIPTION

The VSP1900 is a CCD vertical clock driver with electric-shutter support. This device is composed of eight vertical transfer channels, which support both 3-field CCD and 2-field CCD operation. The VSP1900 contributes low power consumption and device count reduction in the system.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

## VSP1900

www.ti.com

#### SLES062A - MARCH 2003-REVISED JUNE 2012

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

#### PACKAGING ORDERING INFORMATION<sup>(1)</sup>

PROD	UCT	PACKAGE	PACKAGE DESIGNATOR	OPERATING TEMPERATURE RANGE	PACKAGE MARKING	ORDER NUMBER	TRANSPORT MEDIA	
VSP1	900	TSSOP30	DBT	–25°C to 85°C	VSP1900	VSP1900	Tube (60 units per tube)	

(1) For the most current specification and package information, refer to our web site at www.ti.com

### **ABSOLUTE MAXIMUM RATINGS**

over operating free-air temperature range (unless otherwise noted)<sup>(1)</sup>

		VALUES	UNIT
	VDD	GND -0.3 to 7	
Supply voltage	VL	GND to -10	V
	VH	VL + 26	
Input voltage, V <sub>IN</sub>		GND -0.3 to (VDD + 0.3)	V
Ambient temperatu	ire under bias	-25 to 85	°C
Storage temperatu	re, T <sub>stg</sub>	–55 to 150	°C
Junction temperate	ure, T <sub>J</sub>	150	°C
Package temperat	ure (IR reflow, peak)	260	°C

(1) Stresses beyond those listed under absolute maximum ratings may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under recommended operating conditions is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

### **RECOMMENDED OPERATING CONDITIONS**

over operating free-air temperature range (unless otherwise noted)

	MIN	NOM MAX	UNIT
Supply voltage, VDD	2.7	5.5.	V
Supply voltage, VL	-5	-9	V
Supply voltage, VH	11.5	15.5	V
Input voltage, V <sub>IN</sub>		GND03 to (VDD + 0.3)	V

#### SLES062A-MARCH 2003-REVISED JUNE 2012

TEXAS INSTRUMENTS

#### DESCRIPTION

The VSP1900 is a CCD vertical clock driver with electric shutter. The VSP1900 is composed of five 3-state and three 2-state vertical transfer channels, which support both 3 field and 2 field CCD operation. The VSP1900 contributes low power consumption and parts number reduction in the system.

#### OPERATION

#### Power On/Off Sequence

This is the same as the CCD power up sequence, when power on, VDD powers on first VH, VM powers on second, and VL powers on later. When powering off, VL powers off first, VH, VM powers off second, and VDD powers off later.

#### **Vertical Transfer Signal**

The VSP1900 receives signals from TG (CCD timing generator). The input signal is converted into the operating voltage levels of the CCD by the level shifter. The level shifter circuits connect to a 2-state or 3-state driver, which is connected to the CCD input pin. While using a 2-field CCD, one of the 3-state drivers is used as a 2-state driver. The CH#N pin is pulled up internally, so that the VH level does not appear on the output pin.

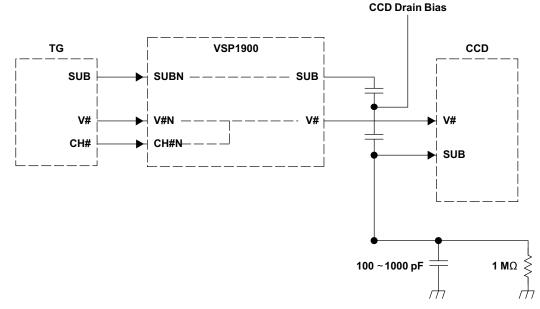

Figure 2. VSP1900 Circuit Application

#### **REVISION HISTORY**

Cł	nanges from Original (March 2003) to Revision A	Page
•	Changed the last sentence of the Description From: "part number reduction in the system." To: " device count reduction in the system.	1
•	Deleted the Tape and reel option from the Ordering Information Table	2
•	Changed the Package temperature value From 2.35°C to 260°C	2
•	Added Table Note " Specified by Design" to the MIN and MAX columns of the ELECTRICAL CHARACTERISTICS and SWITCHING CHARACTERISTICS.	3
•	Changed the Truth Table	6

### PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead finish/ Ball material (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
VSP1900DBT	ACTIVE	TSSOP	DBT	30	60	RoHS & Green	NIPDAU	Level-2-260C-1 YEAR	0 to 85	VSP1900	Samples

<sup>(1)</sup> The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

<sup>(2)</sup> RoHS: TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (CI) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

<sup>(3)</sup> MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

<sup>(4)</sup> There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

<sup>(5)</sup> Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

<sup>(6)</sup> Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
